Grogol, DKI Jakarta

Education

BACHELOR OF ECONOMICS | Universitas Indonesia | Depok, Indonesia 2021
Majors: Economics
Thesis: Does Tax Reliance Cause Democracy? Evidence from Historical Crop Appropriability
Research Interests: Historical Economics, Macroeconomics, Political Economy, Development Economics, Public Finance, and Applied Econometrics

Skills

Econometrics & Statistics	Econometric Modelling, Statistical Modelling, Causal Inference, Spatial Data Science, Dynamic Regression, Time-Series Analysis
Data & Computation	Quantitative research, data analysis, data cleaning, data visualization, exploratory data analysis, large dataset management
Programming & Tools	R, Python, Stata, EViews, SQL (SQLite, PostgreSQL), Microsoft Excel (Power Query, Power Pivot, DAX, Pivot Tables), Git/GitHub, Quarto, LaTeX
Policy & Communication Languages	Policy analysis, policy brief writing, stakeholder engagement, mixed-methods research, report writing Indonesian (native), English (professional)

Professional Experience

- RESEARCH ASSISTANT | CONTRACT | BANK INDONESIA INSTITUTE** May 2026 – Present
- Assisting Prof. Iwan Jaya Azis on a **spatial econometrics** research programme examining interregional growth, inequality, and demand-side spillovers across Indonesia's 34 provinces using a **Spatial Durbin Error Model (SDEM)** framework.
 - Constructing and evaluating candidate spatial weight matrices (W) in **R** and **Stata**, with a focus on **incorporating non-economic proximity factors** to better capture the structural determinants of interregional spillovers beyond standard contiguity and distance-based specifications
 - Producing **analytical reports**, **technical documentation**, and **data visualizations** to support Prof. Azis's research outputs, translating **spatial model results** into accessible evidence for policy-oriented audiences.
- RESEARCH ASSISTANT | INTERN | SMERU RESEARCH INSTITUTE** September 2025 – December 2025
- Conducted **quantitative research** and **statistical analysis** on SUSENAS 2024 microdata using **Stata** to examine socio-economic determinants of child protection and development indicators across multiple provinces.
 - Designed and implemented **reproducible data management** workflows covering labeling, merging, and large-dataset transformation via optimized **Stata .do** files, ensuring high-quality, audit-ready **analysis outputs**.
 - Supported **econometric modeling and descriptive statistical analysis**, generating evidence to inform policy recommendations under Indonesia's national social-protection framework.
 - Integrated **qualitative fieldwork** findings from Kabupaten Batang (Jawa Tengah), including household interviews and FGDs, with **quantitative models** to enrich the **mixed-methods policy analysis** with ground-level evidence.
 - Prepared **data summaries**, **analytical documentation**, and **policy briefs**, contributing to the **joint SMERU-Bappenas–UNICEF study** on strengthening Indonesia's child-development policies.
- RESEARCH ASSISTANT | CONTRACT | LABORATORIUM INDONESIA 2045** April 2025 – August 2025
- Contributed approximately **40% of the project's analytical workload**, with primary responsibility for **econometric modeling**, **time-series analysis**, and **data pipeline development**.
 - Identified and **applied Bootstrap ARDL** with Fourier terms in **EViews** and **Python**, improving robustness of long-run estimates and enabling detection of structural shifts in environmental and **macroeconomic indicators**.
 - Cleaned, transformed**, and **visualized** eight decades of environmental and **macroeconomic data** using **Python** and **Stata**
 - Synthesized **50+ academic sources** into a literature review and contributed **qualitative projections** of Indonesia's environmental and political-economic outlook to 2045.
 - Participated in coordination meetings and **supported the organization** of FGDs, expert interviews, and seminar, ensuring effective research execution and documentation.

- Conducted **macroeconomic policy analysis** and **quantitative research** on fuel subsidy reform and export proceeds retention (DHE) using **Input-Output Tables** and SUSENAS data, producing an internal brief adopted in ministry discussions.
- Produced a **structured policy analysis** on DMO, fuel subsidies, and illegal mining (PETI), submitted to the Staff Khusus Menteri (SKMPPISS ESDM) to support faster strategic decision-making.
- Drafted **policy briefs translating technical econometric** findings into actionable recommendations for senior policymakers, demonstrating strong written communication and stakeholder engagement skills.

Projects

[ACADEMIC PORTFOLIO WEBSITE](#) | Personal Project

March 2026

- Designed and built a fully custom academic portfolio site using **Quarto**, hosted on **GitHub** Pages at farhanadityaramadhan.github.io, featuring multi-select category filtering, a JS-driven featured section, responsive card layouts, and a World Bank-inspired data graphics carousel.
- Serves as a live repository of research outputs, **data visualizations**, **policy analysis writeups**, and **econometric study notes**, covering topics in **causal inference**, **macroeconomics**, **political economy**, and **development economics**.
- Demonstrates end-to-end ownership across content production, **quantitative analysis**, and front-end implementation, with all source code publicly available on **GitHub**.

[REFLEKSI DELAPAN DEKADE DAN PROYEKSI INDONESIA 2045](#) | Laboratorium Indonesia 2045

August 2025

- **Co-authored** a **research monograph** (available at www.lab45.id) examining the long-run relationship between economic growth, democracy quality, and environmental degradation (CO₂ emissions) across 80 years of Indonesian data, with empirical findings supporting the Environmental Kuznets Curve hypothesis.
- Responsible for the **econometric analysis** including Bootstrap ARDL with Fourier terms to test for structural breaks and long-run cointegration across multiple democracy dimensions (electoral, participatory, deliberative, liberal, and egalitarian).
- Contributed **qualitative projections** on Indonesia's environmental and institutional trajectory toward 2045 under contrasting democratic and authoritarian scenarios.

Leadership & Activities

HEAD OF ANALYST DIVISION, BADAN OTONOMONOMICA UI (BOE UI)

- **Led** the division across three years, progressing from **Junior to Senior to Division Head**; managed strategic initiatives, oversaw division projects, and mentored junior analysts in quantitative research methods.

EVENT MANAGER, DISKUSI PUBLIK BOE & ESPRESSO BOE

- **Planned** and **executed flagship events** including Espresso 8 (150+ participants), **managing logistics**, **team coordination**, and **stakeholder communication**.

STUDENT MENTOR, OPK FEB UI

- **Mentored** incoming students through FEB UI's orientation program, **supporting academic** and **personal transitions**.
